

### DESCRIPTION

**Max Shine** is a water-based acrylic polyurethane floor finish with 20 percent solids. **Max Shine** delivers a water clear gloss to bring out a floor's natural beauty. **Max Shine's** unique chemistry enables it to be applied in thin coats for maximum coverage. **Max Shine** can be applied on a variety of floors such as linoleum, marmoleum, vinyl, vinyl asbestos, tile, marble, concrete and even sealed wood. It can be used alone or in conjunction with a high-quality sealer such as **Holdout** and can be applied directly on top of most other finishes to produce a light, clear finish with minimal odour. **Max shine** maybe be scrubbed and re-coated or is fully removable if required.

### FEATURES & BENEFITS

high gloss • burnishable • rapid drying time • 20% solids • resists chemical attacks, black heel marks and yellowing • withstands high traffic wear and abrasive burnishing

### DIRECTIONS

A sealer is not required, but if you have a very porous floor it may be advantageous to apply **Holdout** semi-permanent sealer. Two coats of **Holdout** are often sufficient.

#### Preparation:

Strip the floor with **#1 Remover** then pick up spent solution with a mop or wet-vac making sure solution does not dry. Rinse floor with **NeutraMax** as per label instructions.

#### Application:

1. Apply **Max Shine** with either fine string mop or finish applicator. Allow finish to dry for at least 20-30 minutes.
2. Repeat step 1 until desired gloss is achieved. More **Max Shine** may be required if you have an unsealed or porous floor.

#### Maintenance:

1. Dust mop floor regularly.
2. Clean floor by damp mopping or with an auto-scrubber using our neutral detergent, **NeutraMax**, as per label instructions.
3. Spray buff or burnish as desired. Use a thin topcoat of **Max Shine** as necessary to restore your floor to its original, glossy shine.

### PHYSICAL DATA

Package: 4 x 3.78L cases

& 18.9L pails

Appearance: liquid

Colour: milky white

Foam: low

Odour: cherry

pH: 5.5-6.5
