

LIQUIFRESH

cherry deodorant

DESCRIPTION

Liquifresh is an ultra-concentrated, money saving, odour counteractant. **Liquifreshc** contains an active ingredient that attacks the cause of the odour so that it does not return. Specifically designed residual properties mean that **Liquifresh** keeps right on working, making it a favorite of hotel, motel, nursing home and hospital maintenance professionals. A deodorant that is pleasantly perfumed and is extremely effective in tough applications like, washrooms, garbage cans, disposals, locker rooms, litter boxes, diaper pails and the like. It is also great for unpleasantly lingering cooking odours, air conditioner filters and other such smells.

Liquifresh can be used indoors in industrial, office, marine, recreational vehicle and even residential settings. **Liquifresh** works great and yet is never overpowering and its low foam formulation makes it ideal for extractors and autoscrubbers.

DIRECTIONS

Carpets: Put a few drops right on the source of the odour, or you can add 2 oz of **Liquifresh** to each gallon (16 ml/litre) (1:64) of your shampoo solution.

Automatic scrubbers: Use 2 oz per gallon (16 ml/litre) (1:64) of rinse water to eliminate the 'wet floor' odour.

General deodorizing: Add 2 oz per gallon (16 ml/litre) (1:64) of water and then simply spray lightly into the air. It won't stain sheets, drapes, or clothing. Do not spray **Liquifresh** undiluted though...remember it's ultra-concentrated.

Garbage containers: Mix 4 oz of **Liquifresh** per gallon (32 ml/litre) (1:32) of water and spray down.

Nursing Homes and Hospitals: Squirt a few drops of undiluted **Liquifresh** into bed pans, drainage bottles, urinals, toilets and the like to stop unpleasant odours at the source.

PHYSICAL DATA

Package: 4x 3.78L cases
Appearance: clear liquid
Colour: pink
Foam: low
Odour: cherry
pH: 5.5-6.5
