Dear Dr. Sriskandakumar,

**RE: PCI Cream Cleanser Natural**

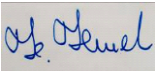

This is in reference to your e-mail of November 3, 2023, seeking our comments on the acceptability of the subject products for use as food contact surfaces cleaners in food processing establishments.

Based on the information submitted, we can advise that we see no reason to object to the composition and use of the subject cleaners in food processing establishments, provided that:

- a) there will be no contamination of food, as a result of their use and storage; and
- b) surfaces subject to direct contact with food are thoroughly rinsed with potable water after treatment with the product to remove any chemical residues resulting from their use.

We trust that the foregoing will be of use to you.

Yours truly,

X
